

MATERIALS

RIGID & FLEXIBLE POLYMERS

We offer expert advice on the selection of polymer for your product depending on its application.

We use many types of plastic to achieve the best result: choose from rigid and flexible PVC, Polypropylene, Glass-filled Polypropylene, Polyethylene, ABS, Acetal, PVC Nitrile and various other materials.

We use recycled materials wherever possible.

DW PLASTICS LTD

PLASTIC EXTRUSION
DESIGN & MANUFACTURE

SPECIALISTS IN PLASTIC EXTRUSION & PROFILE MANUFACTURING

We supply high-quality plastic extrusion products to multiple industry sectors, and we do it all from under one roof in the UK.

From tooling design, in-house tooling and high-volume extrusion manufacture – our team brings together years of experience to help design and manufacture your products while providing an excellent service at every stage.

PLASTIC EXTRUSION

PRODUCTS

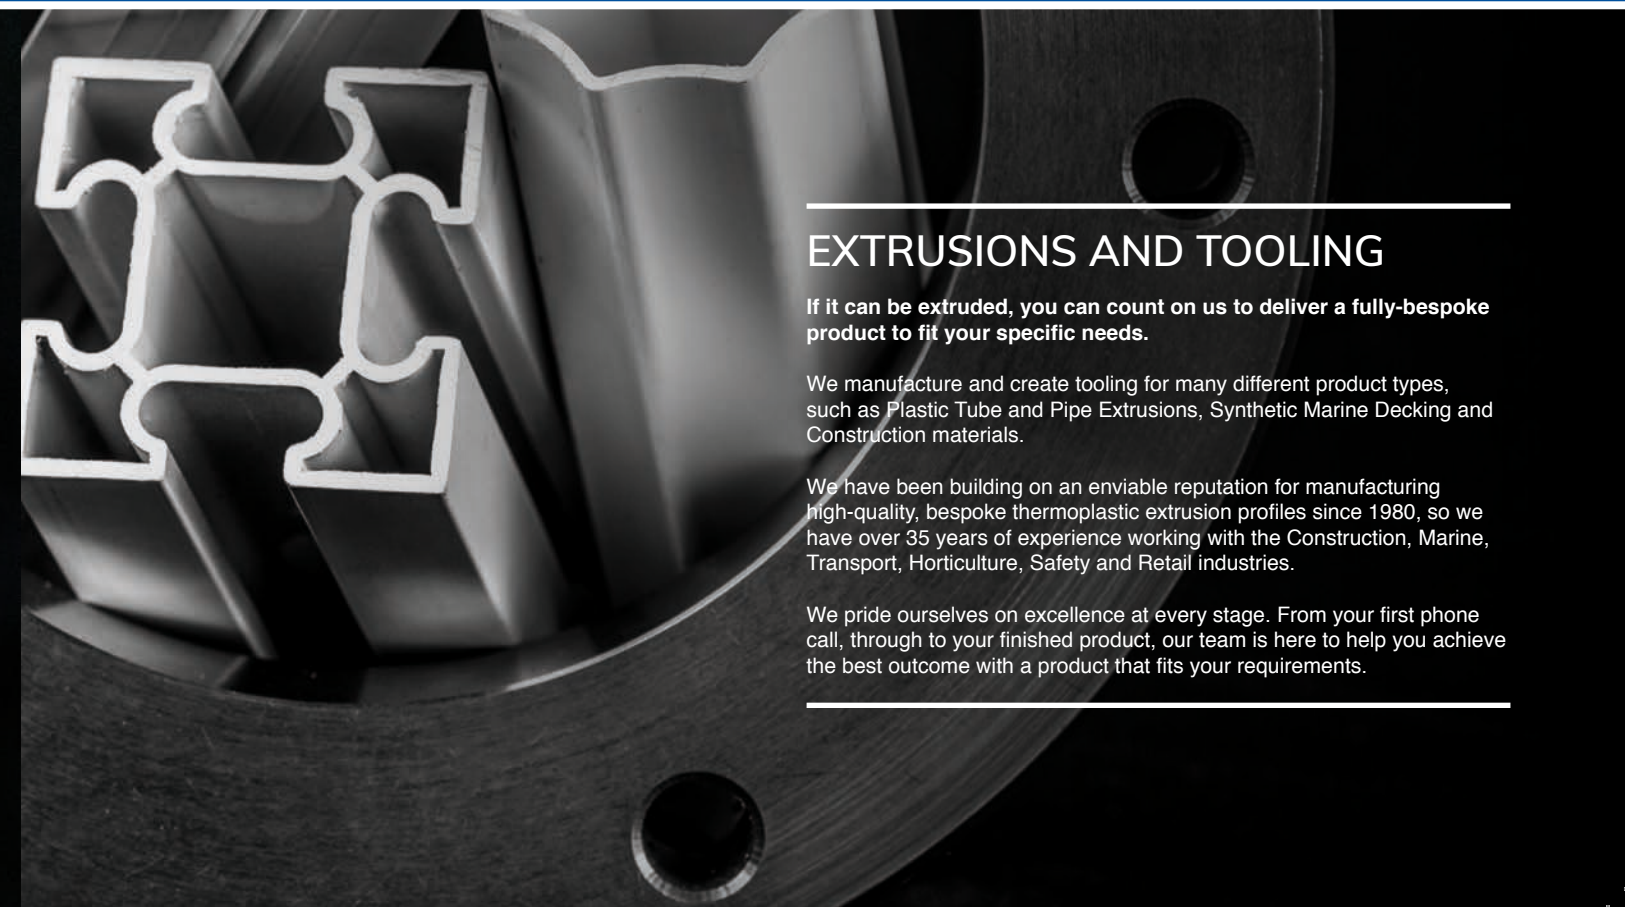

TOOLING & MANUFACTURING

Having everything under one roof lets us move fast to deliver expert production and maintenance services.

All of our dies are designed, engineered and optimised on site. We only use high-grade chromium steel to ensure your order is built to last you for the long term. In addition to a wide range of custom-made extrusions, we have tooling for numerous standard, made-to-order profiles and various tube sizes.

The accurate design, production and maintenance of tooling are vital to an expert extrusion process, ensuring you receive a flawless end product.

We also specialise in a range of finishes, such as a smooth, glossy finish. We can manufacture co-extrude and cross-head extrusion profiles, depending on your desired specifications.

EXTRUSIONS AND TOOLING

If it can be extruded, you can count on us to deliver a fully-bespoke product to fit your specific needs.

We manufacture and create tooling for many different product types, such as Plastic Tube and Pipe Extrusions, Synthetic Marine Decking and Construction materials.

We have been building on an enviable reputation for manufacturing high-quality, bespoke thermoplastic extrusion profiles since 1980, so we have over 35 years of experience working with the Construction, Marine, Transport, Horticulture, Safety and Retail industries.

We pride ourselves on excellence at every stage. From your first phone call, through to your finished product, our team is here to help you achieve the best outcome with a product that fits your requirements.
